

TANYA BELKOV

Senior Software QA Engineer | Payments & Hardware Validation

Folsom, CA 95630 | (916) 833-3032 | tanyabelkov@protonmail.com

[LinkedIn](#)

PROFESSIONAL SUMMARY

Senior Software QA Engineer with **8+ years of experience** leading end-to-end quality assurance across **hardware and unit testing, prototype validation, and high-security payment integrations**. Proven track record of optimizing system performance, ensuring **PCI DSS compliance**, and accelerating product releases within Agile environments. Skilled in orchestrating test strategies for **automated and manual execution**, reducing bug leakage, and elevating product stability across **web, mobile, and hardware platforms**.

TECHNICAL SKILLS

- **Testing Tools:** Jira, Bugzilla, TestRail, Postman, Appium, Device Anywhere.
- **Payment Testing:** Visa Test Suite, UL Test Automation, PCI DSS compliance, Verifone terminals, digital wallets.
- **Languages & Databases:** Python, JavaScript, HTML, SQL, MySQL, SQLite.
- **AR/VR:** Unity, Unreal Engine, Oculus Rift, HTC Vive, PlayStation VR.
- **Web3:** Smart contract workflows, Etherscan, Solscan, Chainlink price feeds.
- **Methodologies:** Agile, SDLC, Manual and Automated Testing, CI/CD.
- **Operating Systems:** Windows, macOS, Linux, iOS, Android.

PROFESSIONAL EXPERIENCE

Senior Software QA Engineer — **Meta** — Burlingame, CA

03/2022 - In transition

- Led end-to-end software and hardware validation for **Visa/Mastercard payment solutions on Verifone terminals**, ensuring secure transaction architecture and full **PCI DSS compliance**.
- Architected comprehensive test strategies covering **digital wallet applications**, transaction flows, and edge-case scenarios to optimize system performance and payment reliability.
- Drove **hardware validation and integration testing** for early-stage prototypes, qualifying embedded sensors, controllers, and peripheral components across cross-platform environments.
- Executed unit, system, and compliance testing to validate billing systems, network certificates, and hardware security policy standards.
- Optimized prototype hardware/software performance, delivering a **40% improvement** in frame rates and system response times through targeted bottleneck analysis.
- Championed quality engineering standards across the full product lifecycle, establishing **unit test coverage baselines** and risk-based validation plans for experimental hardware builds.

Software QA Engineer II — **Cents** — Tiburon, CA

04/2020 - 03/2022

- Drove **multi-platform software validation** across web applications, browser extensions, and mobile platforms on Chrome, Firefox, Safari, Edge, iOS, and Android.
- Engineered rigorous **cross-device test strategies**, validating functional integrity, GUI responsiveness, and cross-platform compatibility for a uniform user experience across diverse hardware setups.
- Partnered with cross-functional development teams on **root-cause defect analysis**, accelerating bug resolution and reducing test plan rework.
- Architected end-to-end **regression and integration test suites** to keep software stable and performant across evolving browser, OS, and device ecosystems.
- Optimized test execution processes, improving test plan efficiency and **shortening release cycles** for multi-platform deployments.

Software QA Engineer I — **CryptoSea** — San Francisco, CA

05/2017 - 03/2020

- Executed manual and automated testing across **Web3 crypto web applications and mobile dApps** (iOS, Android), covering real-time token tracking, functional, GUI, and regression testing.
- Validated **smart contract transaction workflows**, gas fee estimations, slippage settings, and on-chain status confirmations via block explorers (Etherscan, Solscan).
- Conducted **security and data integrity testing**, auditing input sanitization for public keys, network switching, price feeds (Chainlink), and real-time order book updates.
- Optimized defect tracking in **Jira and TestRail**, accelerating root-cause resolution for critical transaction bottlenecks and shortening release cycles.

EDUCATION & CERTIFICATIONS

- **Gen AI Certification** | Folsom, CA | 01/2026
- **ISTQB Certified Tester** | Folsom, CA | 11/2025
- **Quality Assurance Program** | Computer Educational Center, Daly City, CA | 01/2020
- **B.A. Finance** | Ternopil Academy of National Economy, Ukraine | 2004

ADDITIONAL INFORMATION

- Expertise in cross-functional collaboration, delivering projects on time with offshore teams.
- Passionate about continuously improving AR/VR testing practices and optimizing software quality.
